We are delighted to announce the 13th European Bioplastics Conference to take place on 4/5 December 2018 at the TITANIC CHAUSSEE Hotel in Berlin, Germany.

The European Bioplastics Conference is the leading business and discussion forum for the bioplastics sector in Europe and worldwide.

With more and more brands and manufacturers waking up to the potential of biopolymers, and with policy makers increasingly streamlining their efforts to install frameworks that benefit the growth of sustainable bio-industries, this is the time to put bioplastics high up on the agenda of a bio-based circular economy in Europe and beyond.

### Why attend?

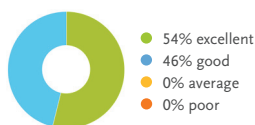

This year's conference will focus on advanced innovations in bioplastics as well as on environmental aspects and opportunities for growth. The impressive speaker line-up attracts more than 330 senior bioplastics decision makers from across the bioplastics value chain, policy bodies, NGOs, and brand owners.

- ✔ **Unique conference programme:** the speaker line-up will demonstrate how far biopolymers have come and highlight some of the latest and most innovative developments in new bio-based materials, applications, processing and end-of-life options.
- ✔ **Excellent networking opportunities:** Social evenings, interactive conference format, exclusive networking areas and a digital partnering tool will connect you to stakeholders and leading bioplastics experts.
- ✔ **Comprehensive product exhibition:** Showcasing the latest products and services, the up to 40 exhibitors bring together decision makers of all sectors of the bioplastics value chain.

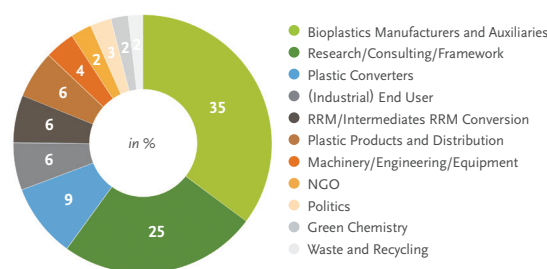

### Our attendees' feedback

We are grateful for the overwhelmingly positive feedback we received for the 2017 conference. Here is a snapshot of how delegates rated the quality of the bioplastics conference:
